Bachelor of law (good)
cairo University 2018 - 2021

MY PROJECTS

e-commerce
Project Overview :
This project is an e-commerce website designed for buying and selling products, similar to Amazon. Users can log in, register as new users, and add new products to the site. It features an admin panel and employs OAuth for user authentication and validation. The project is currently under development and supports multiple languages, including Arabic and English. The technologies used in this project are:
HTML - CSS - React - Next.js - Redux - zod - Hook Form - Vite - Node.js - Tailwind UI - MUI - TypeScript - JavaScript - Git - i18n - OAuth - API
Key Features:
Authentication: Implemented using OAuth and API.
Form Handling: Data retrieval and validation using 'React Hook Form'.
Multilingual Support: Implemented using 'i18next'.
Data Types: Utilized 'Zod' to define data types.
Product Management: Allows users to add new products to the site.
CRUD Operations: Supports Create, Read, Update, and Delete operations for managing products and user data.

salatk
A program that alerts you to prayer times, The technology used in it :
HTML - CSS - js - React - Api with postman - vite - npm - node.js - material ui - tailwind ui - firebase

EXPERIENCE

Junior front-end freelance Oct 2023 - Present
As a dedicated Front-End Developer, I have developed a strong proficiency in HTML, CSS, JavaScript, and modern frameworks such as React and Next.js. Through various personal projects and continuous learning, I have cultivated my skills in creating visually appealing and user-friendly web applications. I am enthusiastic about

bringing my technical expertise and creativity to a dynamic team, contributing to innovative and engaging web solutions.
